Business Insights & Recommendations

Key Insights

- Overall churn rate is approximately 26.5%, indicating that nearly one in four customers leave the service.
- Month-to-month contract customers have the highest churn compared to one-year and two-year contracts.
- Customers using Fiber Optic internet service show higher churn than DSL users.
- Customers with shorter tenure are more likely to leave the company.
- Revenue loss is primarily driven by customers who churn early in their subscription period.

Conclusion

This dashboard provides a comprehensive view of customer churn, retention trends, customer lifetime, and revenue impact. The insights generated can help business stakeholders make data-driven decisions to improve customer retention and maximize revenue.

Business Recommendations

- Encourage customers to switch from month-to-month plans to long-term contracts through discounts and loyalty rewards.
- Improve customer support for Fiber Optic users to reduce dissatisfaction.
- Launch targeted retention campaigns for new customers during their first six months.
- Provide personalized offers for customers with high monthly charges.
- Monitor churn trends regularly using interactive Power BI dashboards.
